-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 7 positively recites a main valve supply port and a main valve in a manner that implies that those elements have been previously positively recited. However, claim 1 from which claim 7 appears to only recite the main valve and main valve supply port via functional language in the preamble. Thus, claim 7 makes it unclear as to whether the claimed subject matter is to include the main valve and main valve supply port.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 and 8-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Chivens.

The Chivens reference discloses a valve which is capable as acting as a pilot for a main valve comprising a seal plate 20, a plate supply port 24, a plate function port 22, a seal carrier 36, a carrier supply port (port in seal carrier 36 aligned with plate supply port 24 in Figure 1), a carrier function port (port in seal carrier 36 aligned with plate function port 22 in Figure 1), a supply seal/supply seal sleeve/elastomer seal 42 (seal adjacent the carrier supply port in Figure 1), a function seal/function seal sleeve/elastomer seal 42 (seal adjacent the carrier function port in Figure 1), and a prime mover/rotary solenoid 46. Regarding claims 3 and 11, the seals 42 effectively seal the metal of the seal plate with the metal of the seal carrier. Regarding claim 5, see the ball bearings in Figure 1 which support the seal plate via the seal carrier. Regarding claims 6 and 12, see the vent port formed between the seal carrier 36 and housing 10.

Allowable Subject Matter

Claims 14-20 are allowed.
